CONNECT AI

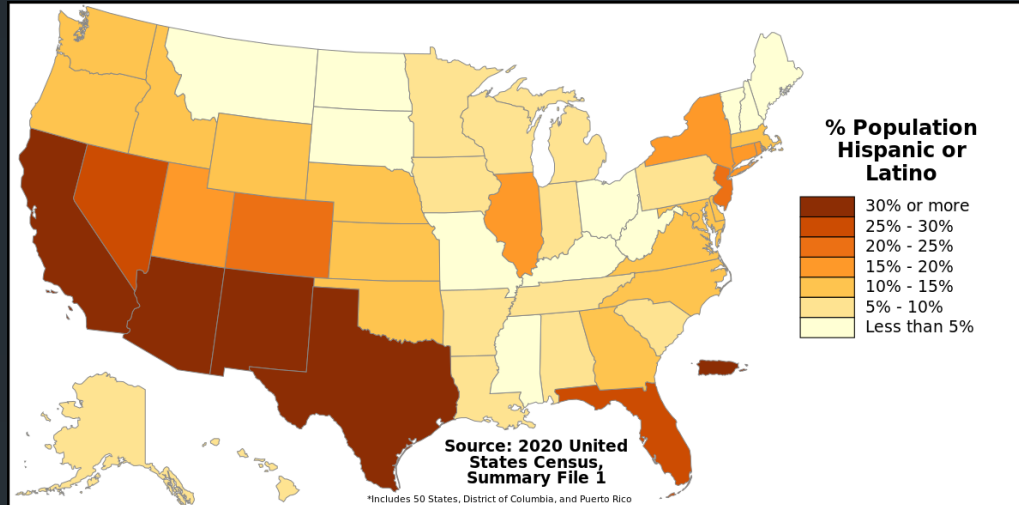

Pioneering AI-Driven Healthcare for
Global Communities

Our Vision

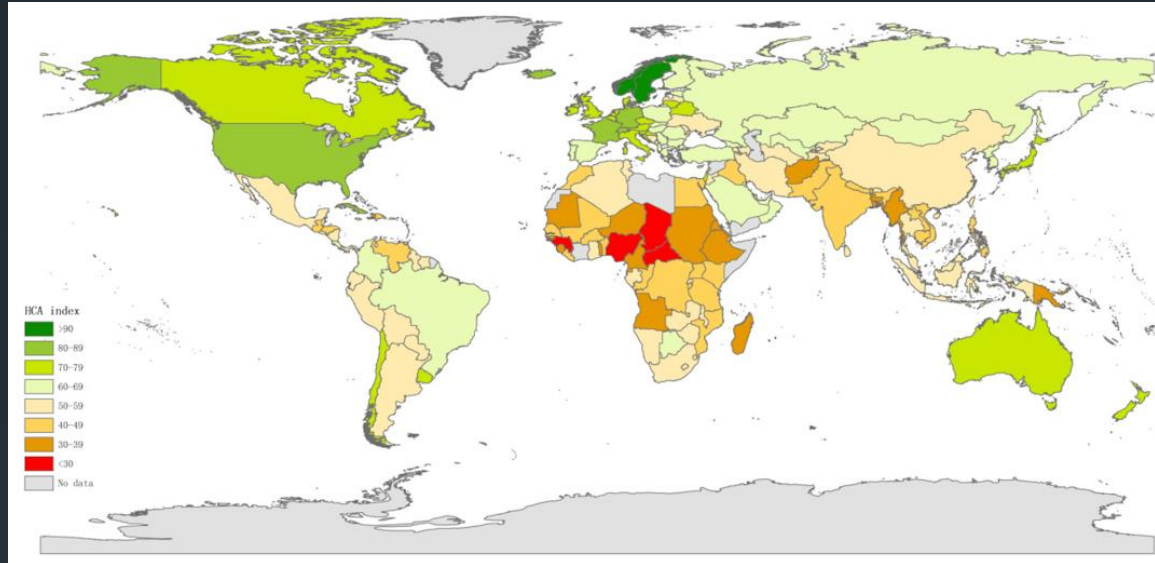

Empower underserved regions with AI-driven healthcare, ensuring easy access to knowledge, quality care, accurate diagnoses, and educational resources, all while bridging language divides.

Language Gap in Healthcare

- 42 million Spanish (non-English) speakers - representing 73% of the Hispanic population
- Only 6% of doctors are Hispanic
- Of the non-Hispanic doctors: a mere 2% speak Spanish
- And that's just the issue in the U.S. Imagine the global scale

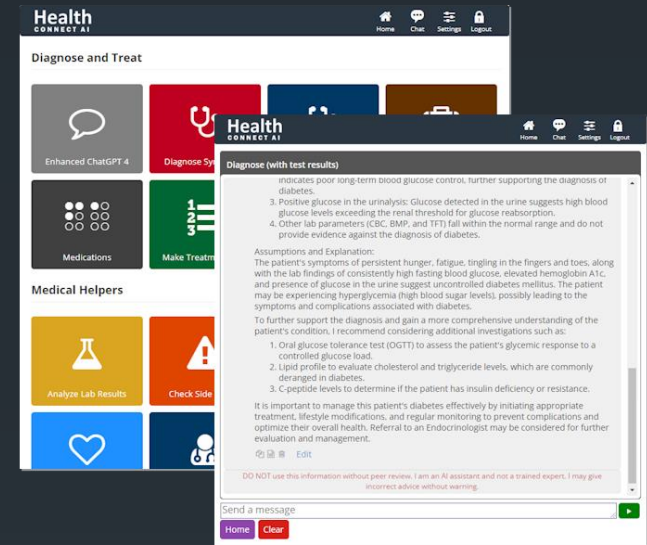

Access Challenges

- Globally, 4.5 billion lack essential healthcare services
- No progress in service coverage since 2019
- AI offers a path to break through this stagnation, enabling better access and quality care in remote and language-diverse regions.

Introducing Health Connect AI

- Benefits Include:
 - Clinicians can use the app in their preferred language
 - Providing patients with treatment education in their native tongue
 - Avoid misdiagnosis with advanced analysis of symptoms
 - 20+ (RAG enhanced) experts in multiple medical disciplines
 - Mobile and remote access
- Our platform enhances language accuracy by combining the OpenAI API with various top-tier translation APIs.

Market Opportunity and Impact

- Targeting a booming global healthcare market at nearly \$11.9 trillion in 2022.
- US spending estimated to reach \$5.7 trillion in 2026 and will represent 19.7% of the US economy (up from 17.9% in 2016)
- Health Connect AI is poised to enhance care in growing markets, especially for those in underserved, minority, and remote communities.

Demo Video (1 minute)

A clinician in a remote area uses Health Connect AI to diagnose a patient accurately, create a personalized treatment plan, and educate the patient in their native language.

Competitive Analysis

- No identified direct competitors.
- Remote, minority and linguistically diverse regions often overlooked by mainstream software providers.
- Bridging communication gaps between healthcare providers and patients.

Meet Raymond Davey

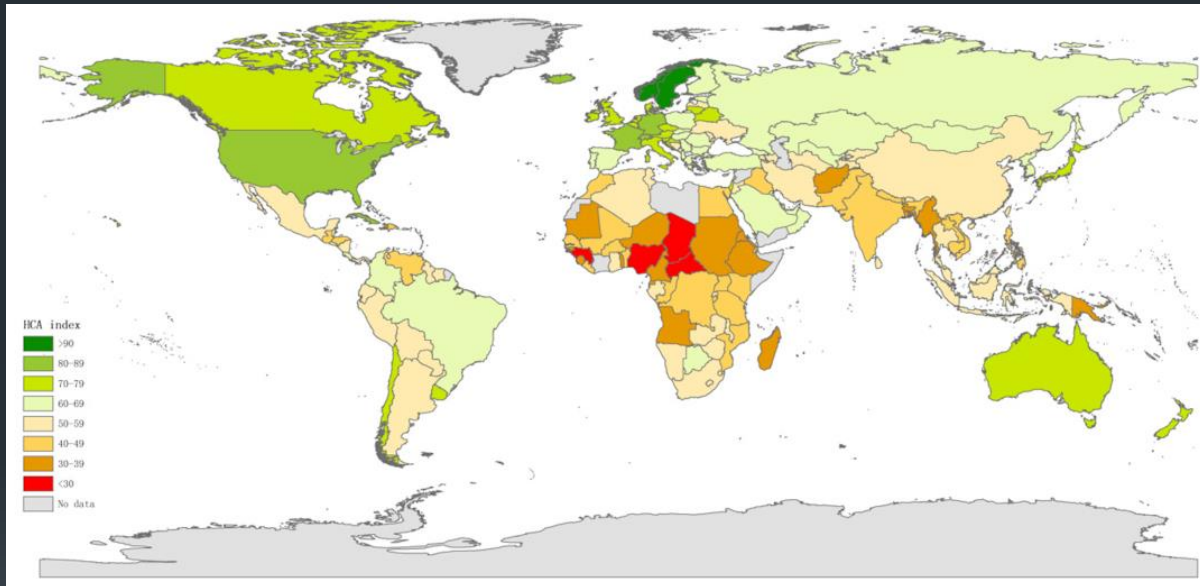

A Solo Founder with Proven Success.

- A rare fusion of tech acumen and entrepreneurial success.
- Track record of a significant SaaS exit, defying the solo founder stereotype.
- Expert in lean startup growth and strategic market entry.
- Committed to driving healthcare innovation and social change globally with Health Connect AI.

Short Term Goals

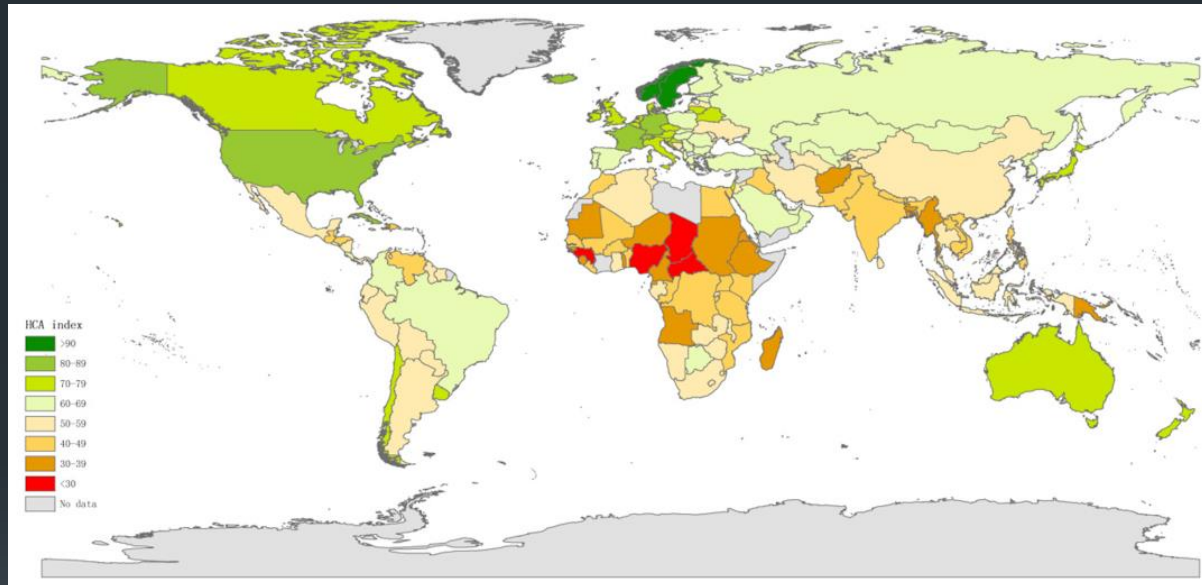

- Launch a pilot program in linguistically diverse regions to evaluate the effectiveness and collect user feedback.
- (HCA 40-59, Kenya, Brazil and Hispanic USA)

- Enhance Health Connect AI's multilingual capabilities to serve non-English speaking healthcare professionals efficiently.

Long Term Aspirations

- Expand the platform's language options post-pilot to encompass a broader range of regions and dialects, driven by user needs and healthcare demands. (HCA 40 to 89)

- Position Health Connect AI as a globally recognized platform that bridges language gaps and elevates healthcare delivery in non-English speaking and remote areas.

Support & Growth Strategy

- We seek collaborations that can open doors to key healthcare markets and provide valuable insights into regional healthcare dynamics.
- We will enhance linguistic and cultural alignment by engaging native language specialists.
- Collaborations with hubs and investors are key for our outreach and impact, helping us navigate market complexities and bring AI-driven healthcare where disparities are most acute.
- Support from like-minded organizations and individuals will significantly amplify our efforts to make a meaningful difference in global health.

I invite you to join us in
transforming healthcare for
underserved communities
through innovative AI
technology.
